

The screenshot shows the Visual Studio Code interface with a Python file named `config.py` open. The file contains the following code:

```
1 def main():
2     try:
3         configuration = open('config.txt')
4     except FileNotFoundError:
5         print("couldn't find the config.txt file!")
6     except IsADirectoryError:
7         print("found config.txt but it is a directory, couldn't read it!")
8
9 if __name__ == '__main__':
10     main()
11
```

The terminal output shows the following error:

```
PS D:\CursoKare> python config.py
couldn't find the config.txt file!
PS D:\CursoKare> python config.py
Traceback (most recent call last):
  File "D:\CursoKare\Desarrollo\jercionferronvalencruz\kare\config.py", line 11, in module
    main()
  File "D:\CursoKare\Desarrollo\jercionferronvalencruz\kare\config.py", line 3, in main
    configuration = open('config.txt')
PermissionError: [Errno 13] Permission denied: 'config.txt'
PS D:\CursoKare\Desarrollo\jercionferronvalencruz\kare>
```

The screenshot shows the same Visual Studio Code interface with the `config.py` file. The terminal output now shows a different error:

```
PermissionError: [Errno 13] Permission denied: 'config.txt'
PS D:\CursoKare\Desarrollo\jercionferronvalencruz\kare> python config.py
couldn't find the config.txt file!
PS D:\CursoKare\Desarrollo\jercionferronvalencruz\kare>
```
